Fundamental Topics in Polymeric Composites:

Synthesis, Characterization and Processing

We are pleased to announce that the PMSE Division of ACS will be holding a symposium titled “Fundamental Topics in Polymeric Composites: Synthesis, Characterization and Processing” for the 2011 Spring National ACS Meeting in Anaheim (March 27th-31st). This symposium series was formulated in response to discussion with several PMSE constituents concerned that recent meetings were becoming too focused on applied research areas. We would like to invite contributed papers on recent topics that highlight fundamental aspects of work in this area to showcase this symposium series.

Confirmed invited speakers:

Matthew Becker (The University of Akron)

Hongyu Chen (Nanyang Technological University)

Todd Emrick (UMass Amherst)

Robert B. Grubbs (Stony Brook, Brookhaven National Labs)

Nicholas Kotov (University of Michigan)

Carson Meredith (Georgia Tech)

Alshakim Nelson (IBM Almaden Research Center)

Jeffrey Pyun (University of Arizona)

Patrick Theato (University Mainz)

Ulrich Wiesner (Cornell University)

Younan Xia (University of Washington)

Yadong Yin (UC Riverside)

For your information, please visit the conference website and submit your abstract
<http://membership.acs.org/P/PMSE/meetings>

A submission of both an abstract and preprint are required for PMSE. Templates can be downloaded at: <http://membership.acs.org/P/PMSE/meetings/template.html>.

The deadline for submissions is October 18th, 2010

We welcome any questions or contributions addressed to the symposium organizers listed below:

Alshakim Nelson
